

Physical Medicine is a fast growing specialization in veterinary medicine and requires proper understanding of the science behind it, but also thorough hands-on experience.

Do you want to become a “CERP - Certified Equine Rehabilitation Practitioner”?

Please take 45 seconds to get a first insight what to expect.....

Go to CERP video

Greetings from the Equine VAHL team:

The CERP program has been developed by the Colorado State University Orthopedic Research Center in cooperation with the University of Tennessee (UT) in 2004. It is the only university-based, RACE approved credential program in equine rehabilitation. Since 2019 the CERP program is also available outside the US, in cooperation with the Veterinary Academy of Higher Learning (VAHL).
